

EASI SCRUB

EASI SCRUB brings new light to the traditional rotary scrubbing machines. Unlike a normal single disc scrubber that is constantly counter-rotating, thus making it difficult to control, EASI SCRUB is stable and easy to utilize. Thanks to a patented technology and structure of the machine, the centre of the machine is greatly balanced. This makes EASI SCRUB easy to control, and less manual strength is required to maintain the machine. EASI SCRUB is suited for most functions ranging from normal daily scrubbing to stone care restoration.

TECHNICAL SPECS

Voltage:	220 V
Weight:	71 Kg
Power:	1100 W
Frequency:	50 Hz
Working Width:	17 In
Rotation Speed:	150 RPM
Noise Level:	54 dB
Dimension:	69 x 46 x 128 cm

Machines are equipped with a safety feature where simultaneous triggering of switch and safety button is needed to activate the machine.

EASI SCRUB can be applied on different types of floors, be it carpet, hard floor, vinyl or different types of stones. With the patented technology, it makes it easy to control and be utilized.

Smooth motor transition is made possible with 3-gear motor. This also lowers the total noise level, allowing the machine to be more silent.

Machine can be used with different accessories and tools for different functions and different floor types.

Machines can be paired with any type of accessories to carry out different jobs.
